Specific Risks Possibilities Associated with Chiropractic Care: Soreness- Chiropractic adjustments and physical therapy procedures are sometimes accompanied by post treatment soreness. This is normal and acceptable accompanying response to chiropractic care and physical therapy. While it is not generally dangerous, please advise your doctor if you experience soreness and discomfort. Soft Tissue Injury- Occasionally chiropractic treatment may aggravate a disc injury, or cause other minor joint ligament, tendon, or soft-tissue injury. Rib Injury- Manual adjustments to the thoracic spine, in rare cases, may cause rib injury or fracture. Precautions such as pre-adjustment x-rays are taken for cases considered at risk. Treatment is performed carefully to minimize such risk. Stroke-Stroke is the most serious complication of chiropractic treatment. The most recent studies estimate that the incidence of this type of stroke is 1 in every 5 million upper cervical adjustments. If you have any questions concerning the above statements, please ask your doctor.

(Please check one below, if you have questions our doctor's will be happy to answer them before administering any treatment)
